

## **NOTICE**

The boil water advisory has been **lifted** after water quality testing confirmed the water system is safe and free of contamination.

You can now use tap water for drinking, cooking, and all other household purposes without boiling.

- **Flush your taps, run cold water faucets for about one minute and hot water faucets for at least 15 minutes.**
- **Drain your refrigerators water dispenser, dump existing ice cubes, and run an empty cycle on your dishwasher.**
- **Dump out any water in humidifiers and refill them with fresh, flushed water.**
- **Water may run slightly discolored or brown at first; let it run for a few minutes until it clears.**

If you have any questions please call City Hall at 706-677-3510.
